DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by German Pilsener lager beer (www.eat-online.net/english/habits/germany_habits.htm) and (www.economicexpert.com/a/Pilsener.htm). With regard to claim 17, Eat online discloses the content of the German Pilsener lager beer (see pages 3-4) consisting of riboflavin (vitamin B2) at a concentration of 336µg/L, which is equivalent to 0.33ppm. Economic expert discloses that the first batch of modern Pilsener was on 5th October 1842 (line 5). Applicant recites in the claim that a hopped malt beverage whereby the riboflavin content is reduced to less than about 0.2ppm has enhanced stability to light. It is inherent that the Pilsener lager beer with 0.33ppm riboflavin, which is about 0.2ppm, therefore has improved stability to light. The fact that the products are made by a different process does not change the end product. *See In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir 1985)(citations omitted).
3. With regard to claim 18, the Pilsener beverage is a beer.
4. With regard to claim 19, the method limitations in a product claim are of no patentable significance unless the product is shown to have different properties.
